ABOUT ME

Final-year Diploma student in Computer Engineering at Government Polytechnic, Pune, with interests in software development, data science, cybersecurity, and emerging technologies. Interested in full-stack development, database systems, and AI/ML through hands-on projects. Motivated to build secure, user-focused solutions, learn new technologies, and apply technical knowledge to real-world problems.

EDUCATION

Government Polytechnic Pune **2024-Present**
Diploma in Computer Engineering (Second year completed; Semester 4 score: 87.5%)

Silver Crest School 2011 – 2024
Secondary School Certificate (SSC) (88.80%)

TECHNICAL SKILLS

Programming
C, C++, Python, Java, JavaScript, SQL

Frontend
HTML, CSS, React.js, Vite, Tailwind CSS

Backend and APIs
Flask, FastAPI, REST APIs

Application Development
Android, Android Studio, XML, Tkinter, Streamlit

Databases and Data Processing
PostgreSQL, MySQL, SQLite, Pandas, openpyxl, JSON, CSV

AI and Data Science
AI/ML fundamentals, Data Mining, WEKA, Google Colab

NLP and Document Processing
Natural Language Processing, multilingual translation, legal-text simplification, OCR, PaddleOCR, OpenCV, PyMuPDF, PDF text extraction

Cloud and Distributed Systems
Google Cloud Platform (GCP), Google Cloud Storage, cloud computing, distributed file storage, file replication

Security and Data Integrity
SHA-256, file-integrity verification, access control, blockchain-based audit ledgers

Networking and Operating Systems
Computer Networks, Advanced Computer Networks, Cisco Packet Tracer, Wireshark (Basic), Ubuntu, WSL, deadlock detection, Banker's Algorithm

Automation and Testing
Selenium, BeautifulSoup, Requests, HTML parsing, web scraping, software-testing fundamentals

Tools
Git, GitHub, Visual Studio Code, Gradle, Tinkercad, Arduino

PROJECTS

NyayMitra
AI-Powered Legal Assistance, Case Intelligence & Document Automation Platform Technologies: React, TypeScript, Vite, Tailwind CSS, FastAPI, Python, NLP, OCR, Selenium, BeautifulSoup, Requests, SQL

- Developed the frontend using React, Vite, and Tailwind CSS and integrated user-facing features with FastAPI backend services.
- Contributed to Juris AI, multilingual legal assistance, NLP-based court-order simplification, and OCR-based document processing.
- Worked on court-case information workflows including CNR-based lookup, case details, parties, timelines, and available court orders.
- Contributed to document extraction and data organization workflows for available court-order PDFs and structured case data.

DecentraCloud
Decentralized Cloud File-Sharing System Technologies: Python, Flask, Google Cloud Platform, Google Cloud Storage, SQLite, SHA-256

- Built a decentralized file-sharing system with replication across three cloud storage buckets, file-integrity verification, and controlled sharing.
- Implemented password-hashed authentication, owner/shared-user access control, and a tamper-evident hash-chain ledger for file events.

FocusForge
Android Productivity & Focus Timer Technologies: Java, Android Studio, XML, Gradle

- Developed an Android productivity application with timer-based focus sessions and a simple user interface.

Deadlock Detection and Management System
Technologies: Python, Streamlit, Banker's Algorithm

- Built an interactive tool to analyze resource allocation, detect deadlocks, and evaluate safe states.

Smart Stock Price Checker
Technologies: Python, yfinance, Pandas, Matplotlib, Streamlit

- Created an application to retrieve stock prices and visualize historical market trends.

Social Guard
Social Media Privacy Optimizer Technologies: Python, Streamlit, Machine Learning, Genetic Algorithms

- Developed an interactive privacy-analysis application to assess social-media privacy risks and support privacy-aware decisions.

OTHER PROJECTS

- **Code & Escape, Coding Challenge Platform**-*Technologies: Java, MySQL, AI integration*
- **Luma AI / Open Sky, Assistive Smart Glasses Concept**-*Technologies: AI concept, OCR, Computer Vision*
- **Airline Management System**-*Technologies: RDBMS, SQL*
- **Smart Noise Level Monitoring System-***Technologies: IoT, ESP32 / microcontroller, sensors*
- **Hospital Management System-***Technologies: C++, Object-Oriented Programming*
- **E-commerce Website & Luxe Bistro Restaurant Website-***Technologies: HTML, CSS, JavaScript*

ACHIEVEMENTS & ACTIVITIES

- Team Lead — VES Technothon: led team coordination and presentation of the Luma AI / Open Sky assistive eyewear concept; qualified for Round 1.
- Participant — Back2Hack '26, UNLEASH '26, ASCoD, Government Polytechnic Pune.
- Participant — MindSpark '25, COEP Technological University: GoOGLer, Code Junkie, and Sherlocked.
- Participant — ASCoD DevSprint 2025: Buzzer Quiz and Treasure Hunt.
